

CASE STUDY: Honeywell

THE ASK

A full end-to-end solution, from marketing of the bursar programme, to recruitment, the management system and managing the bursars themselves within the faculty of Engineering (specifically chemical & aeronautical).

THE RESULT

We have a **long-standing relationship** with Honeywell. Through the great work we have done on the student bursary side, we were asked to **add their internal family bursary program** to our system, for children of staff.

HOW WE DID IT

The Student Village team walked the journey with each and every bursar. From the moment they are on-boarded, bursars are supported from day one across our key areas of influence: Academic tutors, weekly check-ins (calls, Whatsapp, emails), pre-test & exam preparation and emotional support outside of the programme. This combination ensured both a successful bursar and client experience throughout the programme.
